SKILLRACK

C++ - Class Method Definition Calculator add

Fill in the missing lines of code to define the class **Calculator** along with the **method add** so that the program accepts two integers as input and prints their sum as the output.

Max Execution Time Limit: 5000 millisecs

Ambiance

CPP17 (CPP 17)

```
#include <iostream>
using namespace std;
```

```
class Calculator{
    public:

    int a;
    int b;

    Calculator(int aa,int bb){
        a=aa;
        b=bb;
    }

    int add(){
        return a+b;
    }
};
```

```
int main()
{
    int a,b;
    cin >> a;
    cin >> b;
    Calculator calc{a,b};
    cout << calc.add();
    return 0;
}
```
