```java
import java.util.*;
public class Hello {

    public static void main(String[] args) {

            Scanner sc = new Scanner(System.in);

            Hashtable<Character,Integer> ht  = new Hashtable<>();
            int c=0;

            char arr[] = sc.nextLine().toCharArray();
            for(int i=0;i<arr.length;){
                if(ht.containsKey(arr[i])){
                    c++;
                    ht.clear();
                }else{
                    ht.put(arr[i],1);
                    i++;
                }
            }
        System.out.println(c+1);

        }
}
```
